Your Score

110

Score Interpretation

The Pre-NAPLEX[®] and the North American Pharmacist Licensure Examination[®] (NAPLEX[®]), are scored via a weighted mathematical model. Resulting scores are scaled, or transformed, to be reported on an integer score interval between 0 and 150, where 0 represents a very poor performance on the exam and 150 represents a very strong performance. Your Pre-NAPLEX score does not represent a number correct or percent correct score. The score is intended to provide you with information on your performance on a subset of NAPLEX items under pre-testing conditions. Unlike the NAPLEX, the Pre-NAPLEX is not a pass/fail examination.

Exam Purpose

The purpose of the Pre-NAPLEX is to help you prepare for the NAPLEX by providing an opportunity for you to familiarize yourself with item formats, language, test layout, and content typically seen on the NAPLEX. The Pre-NAPLEX is built to the same content specifications as the NAPLEX and is assembled from actual test questions that have appeared previously on the NAPLEX.

The Pre-NAPLEX is a practice exam and is not designed to predict NAPLEX scores. Your Pre-NAPLEX score may significantly differ from your actual NAPLEX score. The National Association of Boards of Pharmacy[®] does not claim that a strong performance on the Pre-NAPLEX predicts passing the NAPLEX.
