

Course Planner

Fall/Semester 1	Spring/Semester 2
<input type="checkbox"/> General Biology I..... 4 hours <input type="checkbox"/> General Chemistry I..... 4 hours <input type="checkbox"/> English Composition..... 3 hours <input type="checkbox"/> Calculus..... 3 hours Total..... 14 hours	<input type="checkbox"/> General Biology II..... 4 hours <input type="checkbox"/> General Chemistry II..... 4 hours <input type="checkbox"/> English/Communication..... 3 hours <input type="checkbox"/> Elective..... 3 hours <input type="checkbox"/> Statistics..... 3 hours Total..... 17 hours
Fall/Semester 3	Spring/Semester 4
<input type="checkbox"/> Human Anatomy & Physiology I..... 3 hours <input type="checkbox"/> Organic Chemistry I..... 4 hours <input type="checkbox"/> Physics..... 3 hours <input type="checkbox"/> Elective..... 3 hours <input type="checkbox"/> Social Sciences..... 3 hours Total..... 16 hours	<input type="checkbox"/> Human Anatomy & Physiology II..... 3 hours <input type="checkbox"/> Organic Chemistry II..... 4 hours <input type="checkbox"/> Microbiology..... 3 hours <input type="checkbox"/> Social Sciences 3 hours Total..... 13 hours

- Biology and chemistry must include a laboratory component.
- We will accept genetics, cell biology, or biochemistry as courses for the biology prerequisite.
- We do not require a laboratory for physics, microbiology, anatomy, and physiology.
- Additional courses to meet the English/Communication requirement include English literature, English composition, speech, communications, or other linguistics courses.
- Courses meeting the social science definition include anthropology, child development, economics, geography, history, linguistics, management, political science, psychology, social work, sociology, and women's studies.
- A combined human anatomy and physiology course is acceptable, or applicants may take separate courses on anatomy and physiology. We will accept comparative anatomy and physiology courses to meet this requirement.
- Electives may be obtained from any college level course. Additional training in science, math, biochemistry, and English/communication are recommended to prepare for success in the PharmD curriculum.
